

Xenic True Spirit

Every great design begins with an even great story. Joe Leong, designer of Artmatrix reveals the beauty of nature. This timeless office chair was inspired by the dance of the multi-colour butterfly, and now its wings are fully supporting and caressing the lumbar for a comfortable sitting posture.

New developments in materials, usage concepts and social trends repeatedly transformed Xenic beyond its limit. Also, Xenic adds a vivid ambience in modern office environment and passes the significance of innovation for an office chair.

Gifted by nature

Comfort, Classic and Elegance

People are spending most of the time at work sitting in an office chair. An ergonomic chair provides not only the proper function but ensures people to be able to sit and be productive for a longer duration.

Xenic chair comes in 2 options, basic range or advanced range with reliable support and unexpected comfort in a sophisticated design. Xenic basic range features breathable yet high performance suspension back, optional lumbar support is available in Xenic advanced range for added comfort at the lumbar areas.

Xenic equipped with single-axis adjustable lumbar support and seat depth adjustment that enable users to get into comfortable posture quickly and improve working experience. Variety colour selection for headrest and seat textiles, backrest, lumbar support and base finishes, Xenic can be customized to match any palette in any environment.

FEATURES

Supportive Backrest

Mesh designed backrest is ergonomically curved to fit your body and its breathable mesh provides comfortable sensation even after long hours of sitting.

Changeable Headrest Cover

The innovative changeable seat cover, allowing ease of replacing the headrest cover for cleanliness and colour matching.

Armrest

Xenic polypropylene armrest is ergonomically designed with slight curve to allow your hands to rest comfortably. It is available in height adjustable or fixed armrest.

Adjustable Lumbar Support

Xenic lumbar support is ____ made of High Density Polyethylene (HDPE), a lightweight and high tensile strength plastic that is recyclable yet environmentally friendly. Changeable Seat Cover The innovative changeable seat cover comes with velcro feature, allowing ease of replacing the seat cover for cleanliness and colour

matching.

Dualwheel Nylon Castor Xenic sturdy 60 mm dualwheel nylon castor provides smooth

gliding on floor and even carpet.

Polypropylene seat shell

Polypropylene seat shell which made of recycled material is durable and eases of changing seat cover.

FUNCTIONS

Xenic Adjustable Armrest The optional 2D adjustable armrest provides adjustment for height and sideway angle to support wrists and forearms comfortably.

Adjustable Lumbar Support Xenic lumbar support comes together with spring load adjustment, which allows you to adjust it in various heights and keep your spine in the correct position.

Mars Adjustable Armrest The optional height adjustable armrest with polyurethane armpad for comfortable support.

Adjustable Headrest

The nylon headrest with height adjustment and intuitively bend function allows a greater flexibility to adjust your posture for utmost comfort along with colourful fabric cover.

Synchronized Mono-locking Mechanism Automatically coordinates your seat and back movement, and lock your position into one selected position.

Y Mechanism

Seat Depth Adjustment

Xenic adjustable seat depth allows you to slide the seat pan to accommodate different leg length for greater comfort.

P Mechanism

Self-weight Adjustment Self-adjust based on your weight to provide perfect recline with the correct tension.

Synchronized Multi-locking Mechanism

Automatically coordinates your seat and back movement, and lock your ideal position in 3 lockings position to suit your posture.

P Mechanism T Mechanism

Tilt Tension Adjustment

Provide appropriate reclining control to find your ideal resistance according to your body weight.

Seat Height Adjustment Adjust the seat so that your feet are resting flat on the floor and there is minimal pressure on the back of your thighs.

XENIC SEAT IN NATURAL LATEX

* Natural latex seat is applied only in Xenic Chair Xenic seat uses natural latex foam obtained from the sap of rubber tree. It provides natural spinal support and maximum comfort. The small pinhole design on the cushion offers excellent ventilation to promote air circulation on your seat.

In addition, Xenic cushion is resistance to compression and contoured to your body shape.

A Xenic chair seat in latex foam produces 75.56 kg CO2 eq carbon footprint compared to Xenic chair seat in PU foam that produces 81.2 kg CO2 eq. Hence by choosing latex foam, a Xenic chair will produce a lower life cycle carbon footprint.

With this seat cushion made of natural latex, the entire chair becomes a highly sustainable product and qualified as a "GREEN CHAIR".

Carbon footprint of Xenic at different stages:

Stages	Kg CO2 eq	%
Production	68.07	90
Transportation	0.95	1
Disposal	6.54	9
Total	75.56	100

This product has been independently verified for Environmental Product Declaration.

🔰 The environmental impacts of this product are relatively low given the inert nature of the materials used.

We have committed to reduce the carbon footprint of this product.

PRODUCTION

This category encompasses the carbon emission of Xenic production from cradle to gate. The processes start from the extraction of raw materials until the packaging of the final product before the goods are delivered.

This phase includes the carbon emission during the recycling and disposal of Xenic, which accounts the transport of Xenic from its last user, to the site of waste management.

Xenic Chair Carbon Footprint (Seat in Latex) 75.56 Kg CO2 eq An Environmental Product Declaration by Intertek

There are no relevant environmental impact occurs during the use of Xenic since it requires no energy inputs (such as electricity consumption).

TRANSPORTATION

- Transportation of all material to Artmatrix manufacturing facility.
 Transportation of final
- products to our customers.
