Our Xeranthenum...

Natural design like Xeranthenum, a group of plants in sunflower family which having flower head that are dry and retain their shape for years, this is the inspiration that led Joe Leong, designer of Artmatrix to design a multipurpose chair, Xera with a board of application range for private offices, conferencings, classroom, cafeterias, and waiting lounge.

Xera is built up from recycable individual components and most of the parts are made of polypropylene and nylon, this making the chair certified green and highly recyclable. The ergonomic design backrest and seat provide individual comfort and support while seated at work.

Xera family includes swivel chair, nesting chair, stacking chair and link chair offering countless configurations within any environment. Different shell and upholstery colours and various bases provide Xera a multitude of probable combinations. Optional for an attached foam padding covered in fabric on back and seat provides enhanced comfort and for long hours sitting. The merging a mesh layer on polypropylene creates a dynamic hybrid structure on the suspension back.

Available in a palette of vibrant colours, Xera presents a dynamic nature to brighten up your environments. You can customize the chair by choosing between a grey or black frame, four different back and seat colours, and a wide choices of upholstery options.

XERA SWIVEL

OFFICE TASK CHAIR

Xera Swivel with pneumatic seat-height adjustment enables people of different sizes to fine-tune their comfort level. It provides mobility in the workplace as well as conference areas and discussion areas.
