E-FLEX

60 mm Monolith Panel Base System

A 60 mm thick Monolith Panel Base System created with rigid aluminium structure is designed to come out a fine choice and alternative well-designed system in modularity. It can be combined with extensive choices of panels which allow maximum personalization of the workspace.
HYBRID SYSTEM

The Efficient & Effective Workspace

The combination and integration of E-Flex and TrendX Pro System present an innovative visual in the working place. The E-Flex panel at the middle part of workstation provides an adequate shielding for the people. By having the TrendX Pro table leg, it reveals a simple yet attractive design. For those with highly storage demand, the ample and multiple type of storage available helps the people to enjoy their greater control over their space.
GENERAL WORKSTATION

A Versatile Yet Integrate Workspace

Team members, who require adequate interaction and privacy, will benefit greatly from this configuration. The 60 mm E-Flex panel integrates with the aluminium TrendX Pro leg transmits the good balance between privacy and communication and modern image in the workplace. While the semi-enclosed workspace with the adequate storage, allows indivudual to work independently. The fabric panel creates a certain level of privacy, while the glass panel keeps the area visually light and sleek.
